Broiler Eggs Set In 15 Selected States Up 2 Percent

Commercial hatcheries in the 15-State weekly program set 139 million eggs during the week ending August 3, 1991. This was 2 percent above the 136 million eggs set the corresponding week a year earlier. Average hatchability for chicks hatched during the week was 83 percent. Average hatchability is calculated by dividing chicks hatched during the week by eggs set three weeks earlier.

Broiler Chicks Placed Up 2 Percent

Broiler growers in the 15-State weekly program placed 112 million chicks for meat production during the week ending August 3, 1991. Placements were 2 percent above placements for the comparable week in 1990. Cumulative placements from November 4, 1990, through August 3, 1991, were 4.34 billion, 3 percent above the 4.19 billion placed during the same period a year earlier.
